BM-Tilt safe handling og pallet tanks

BM-Tilt with pallet tank

BM-Tilt handled with stacks

A safe work environment ☺

BM-Tilt ensures that the pallet tank is completely emptied, regardless of whether a suction lance is used, or the tank is emptied using the bottom valve.

BM-Tilt is a newly developed manual, hydraulic handling, and tilting device for pallet tanks.

BM-Tilt can be handled using a truck, stacker or lift truck, and the tilting function is easy with the built-in hydraulic jack, simultaneous ensures an edge that the pallet cannot slide.

BM-Tilt is made of aluminum and is available in 2 sizes: BM-Tilt/EU 80x120 and BM-Tilt/XL 100x120.

BM-Tilt is delivered CE marked.
