Fail-safe gate

Flow regulation

VE (Value-Engineering)

Value-adding development, design, optimization of everything from the project stage to finished product. BioMizing has associated the best engineers, technicians and designers and only use the latest new technology, regardless of whether it concerns design, calculations or drawing material. We think unconventional and see opportunities rather than obstacles!

Among BioMizing VE-tasks can the following be mentioned:

- Fail-safe gate (protection against flooding, carried out at RA HCR-Syd)
- Flow distribution (distribution of flow to process tanks, carried out at RA HCR-Syd)
- Sludge decantation (flood sludge optimization, carried out at RA HCR-Syd)

Contact us for a nonbinding meeting and see what we can do for you.
